

LVX

SAFETY ISOLATING LOW VOLTAGE TRANSFORMERS

Overview

The LVX Series safety isolating transformer has been purpose built for the swimming pool industry. Featuring a host of innovative features, the LVX Series will simplify your installation while providing your clients with quality, long lasting power supply for their underwater lighting systems.

The LVX Series innovative case design allows the unit to be installed in multiple orientations, allowing you to position the transformer to best suit the installation; minimizing the use of unsightly conduit and ensuring a clean and professional installation every time.

Combine this with large termination compartments, Dual 1/2" & 3/4" conduit knock-out positions and a robust and stylish case design that completes any pool installation.

High Quality

With greater efficiency and power stability than a EI coil, our high quality Toroidal coil transformer consumes less energy and lasts longer than traditional transformers.

Water Tight

Never worry about moisture again. The LVX series uses the same sealing technology as our underwater lights. Guaranteeing moisture problems are a thing of the past.

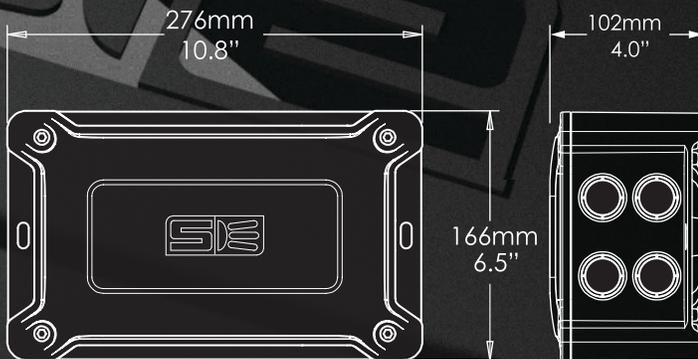

Quick Connect

Complete the installation with confidence, using the latest Quick-Connect termination blocks supplied for primary and secondary connections.

Product Specifications

Parameter	Specification
INPUT:	120V 60Hz
OUTPUT:	12V / 13V AC
WATTAGE:	50W / 100 W
INPUT CONNECTIONS:	2 x DUAL 1/2" / 3/4" + 2 x 3/4" PORTS
OUTPUT CONNECTIONS:	2 x DUAL 1/2" / 3/4" + 2 x 3/4" PORTS
CERTIFICATION:	cULus
WARRANTY:	3 YEARS
SUITABLE FOR:	SWIMMING POOL & SPA LIGHTING

3 YEAR
warranty
