

ECO SYSTEM IN-FLOOR CIRCULATION & CLEANING

KEEP YOUR POOL BLUE  
& THE ENVIRONMENT GREEN.

**ECOSYSTEM**  
IN-FLOOR CLEANING & CIRCULATION

# OPTIMIZED TO CLEAN YOUR POOL, AND HELP CLEAN THE ENVIRONMENT.

## ECO FRIENDLY & ALWAYS SWIM READY

Modern multi-speed pumps are great for lowering your electric costs. ECO System is engineered to work specifically with multi-speed pumps - and at those lower, money-saving pump speeds. Utilizing that sweet spot of efficiency, while effectively cleaning and circulating the entire pool, including walls, floors, steps, benches, and even spas.

ECO System's nozzles pop up systematically to clean, then retract flush with the pool floor, becoming virtually invisible. No vacuum hoses left floating in the pool, no mechanical devices to be removed. All that's left is a sparkling clean pool that's ready to enjoy.

## GUARANTEED CLEAN & CAREFREE

Paramount in-floor cleaners are the most technologically advanced pool cleaners available, and we guarantee it. ECO System is so effective, it will clean 99% of your entire pool guaranteed,\* with minimal maintenance required. It's also built to last for the life of your pool, and comes with a lifetime limited warranty on all cleaning nozzles.

- 99% POOL CLEANING GUARANTEED\*, INCLUDING STEPS, BENCHES, SPAS AND WATER FEATURES
- OPTIMIZED FOR MODERN MULTI-SPEED PUMPS
- NO UNSIGHTLY CLEANER TO REMOVE
- HIGHER EFFICIENCY AND LOWER CHEMICAL USE

## CLEAN & VIRTUALLY UNSEEN

Pool dimensions, size and other requirements exist; confirm compatibility with builder. \*99% Clean Guarantee: Pool design, elements or features that prohibit placement of system components will not be considered part of the 99% cleaning guarantee. The ECO System 99% Cleaning Guarantee requires the use of ECO system components, ParaskimV and MDX/R3. See cleaning certificate for complete details.

# ENVIRONMENTALLY EFFICIENT TECHNOLOGY

## POWERFUL CLEANING CYCLES

ECO System cleaning nozzles are designed specifically for high efficiency performance. Placed strategically in your pool floor, steps and benches to work together to systematically sweep debris out of your pool through the main drain and skimmer. After about an hour, nearly every square inch of your pool will have been swept one time. All while utilizing modern multi-speed pumps at their best efficiency settings.

## EFFICIENT & ECONOMICAL

A key benefit of ECO's water-powered hydraulic valve is its increased performance over traditional mechanical valves. Built for both single speed and multi-speed pumps, ECO System uses less energy and operates with more power each and every cleaning cycle. It provides enhanced circulation at even the lowest pump speeds, giving ECO System unsurpassed performance among agitation-style in-floor cleaning systems.

- EFFECTIVELY CLEANS THE ENTIRE POOL
- VIRTUALLY INVISIBLE WHEN NOT IN USE
- LIFETIME LIMITED WARRANTY ON NOZZLES
- AVAILABLE IN 6 COLORS

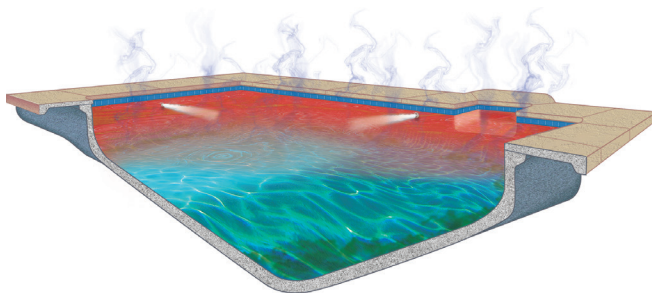

# CIRCULATION MEANS CLEANER, HEALTHIER WATER

## AN ADVANCED CLEANING & CIRCULATION SYSTEM

In standard swimming pools, water circulates near the pool surface, where chemicals and heat are quickly lost into the atmosphere. This means wasted chemicals, wasted heat energy, and poorly circulated areas that can become algae-prone. ECO System improves circulation with strategically placed cleaning nozzles that evenly circulate water. This improved circulation has been proven by independent studies to create cleaner, healthier, and more comfortable pool water, while reducing the loss of chemicals and heating energy into the atmosphere.

Pool without ECO in-floor system is poorly circulated, resulting in chemical and heat energy loss, as well as algae-prone areas

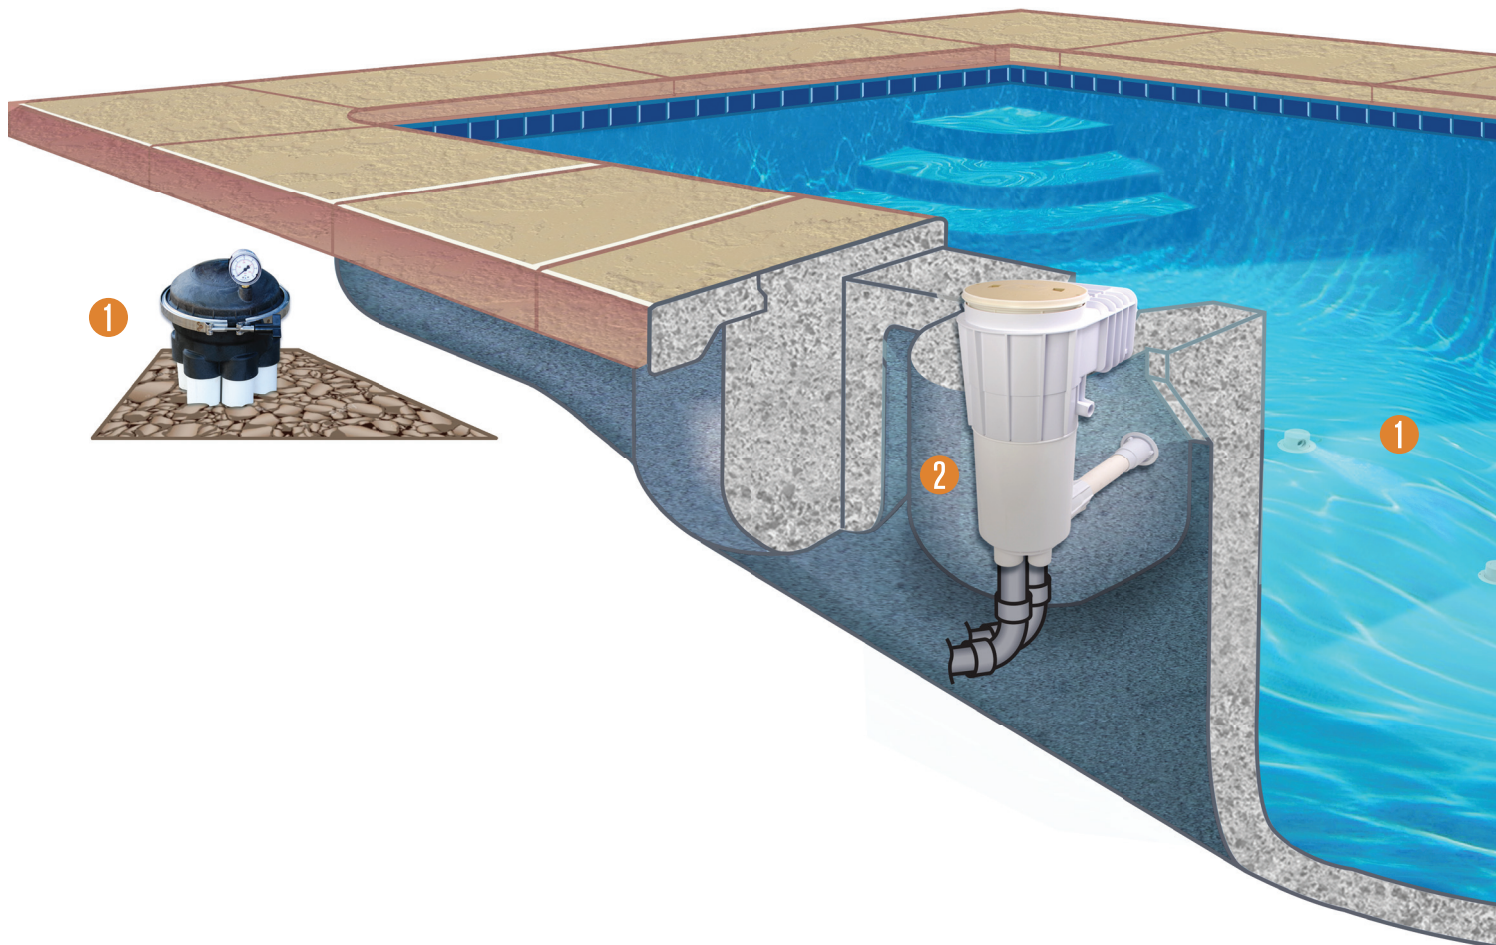

## A WELL-CIRCULATED ECO SYSTEMS POOL MEANS:

- COMPLETE CIRCULATION OF WATER AND CHEMICALS
- NO POORLY CIRCULATED OR ALGAE-PRONE AREAS
- ELIMINATES COLD SPOTS FOR MORE COMFORTABLE SWIMMING
- EXTENDS THE SWIM SEASON
- SAVES ON CHEMICAL AND HEATING COSTS FOR THE LIFE OF THE POOL
- BETTER FOR THE ENVIRONMENT

# A SYSTEM OF EFFICIENCY STARTS HERE

## COMPONENTS WORKING TOGETHER FOR ECO-CONSCIOUS CLEANING & CIRCULATION

### 1 WATER VALVE & POP-UP NOZZLES

The brain of the system. 100% pressure safe, hydraulically driven, and requires no maintenance. Rotating nozzles sweep debris off pool floors, steps and benches towards the debris drain. Nozzles have been specifically engineered for maximum cleaning even with lower pump speeds.

### 2 PARASKIM V VENTURI SKIMMER

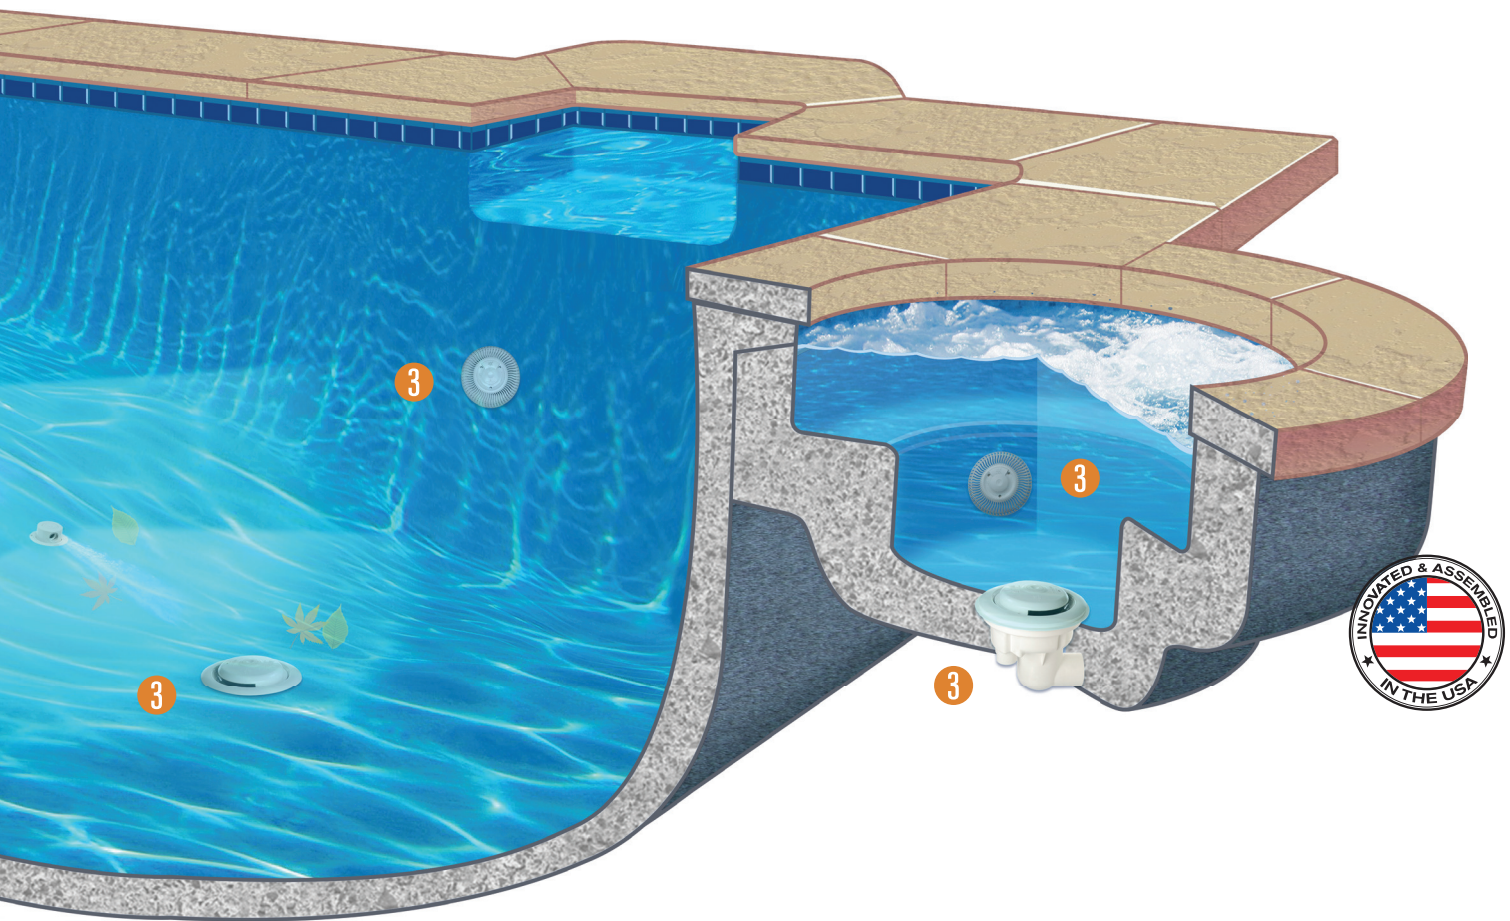

This eco-friendly skimmer utilizes venturi technology for high-performance surface skimming, which in turn enables enhanced debris removal by the MDX-R3 drain. Features the largest capacity basket on the market, and numerous patents for safety, circulation and convenience.

### 3 MDX-R3 & SDX2 DRAINS

Working in conjunction with the ParaskimV venturi skimmer, this highly engineered debris drain effectively and safely removes large debris from the pool. Combining with the SDX2 provides additional anti-entrapment protection.

**Pool dimensions, size and other requirements exist; confirm compatibility with builder. Note:** 6-port water valve, ECO System nozzles, ParaskimV venturi skimmer and MDX-R3/SDX2 are mandatory equipment to fully clean and circulate. **Warning:** MDX-R3 and SDX2 must be installed in accordance with Paramount's written instruction manual in conformity with applicable federal, state, local and swimming pool industry building and safety codes.

## OPTIONAL EQUIPMENT FOR ADDED CONVENIENCES

### EDC / DDC2 DEBRIS CANISTERS

A large capacity debris containment canister collects debris before it reaches the pump basket, reducing stress and keeping the pump running efficiently. Available for deck-side convenience or equipment pad access.

## Pool life. *Simplified.*

Since applying for our first in-floor cleaning patent in 1967, Paramount has been a leader in pool technologies. Developing cleaning and circulation systems that will deliver superior results, while paying for themselves over the lifetime of the pool.

All Paramount products are innovated and assembled in America, and designed to make your pool experience the most carefree and enjoyable experience possible.

"Our passion is driven by creating innovative products and services that simplify your pool life"
