# POOL STAIN REMOVAL

## QUICKFIX

**SPOTBLOC™** is a Unique Spot Stain Removal Chalk that dissolves most metal and organic stains from underwater surfaces. Ideal for removing the waterline scum mark and many other underwater spots and stains. **SPOTBLOC™** is a blend of Special Acids and Chelating Agents with Block Technology.

## SUREFIX

**Heavy Duty SeriouStain™ Remover** uses potent organic acids to eliminate mineral discoloration and organic stains from most pools & spa surfaces *without draining the water*. It is a **DIY pool treatment** suitable for all pool & spa surfaces removing iron, calcium, manganese, copper as well as dead blackspot, algae and leaf marks.

## PREVENTION

**SeriouStain™ Inhibitor** helps prevent staining by "Locking up" potential mineral discoloration caused by dissolved metals and bore water. Regular use reduces scale build up on salt chlorinator electrodes and is suitable for all pools & spas. Prevents future staining after treatment with the **SeriouStain™ Remover**.
