

# Converting Spas to The Spa Solution System® An All-Natural Water Conditioner

TIMING	WHAT TO DO				
<b>Used Spa Preparation</b>	<ul style="list-style-type: none"> <li>Remove cartridge filter and thoroughly clean by soaking overnight in a pail of water with 100 ml of <b>FILTER SOAK</b> or replace the cartridge.</li> <li>With spa water temperature at 35°C (95°F) or higher, and circulation running, add one 480 ml bottle of <b>RAPID PURGE</b> to the existing water. <b>SHAKE WELL BEFORE APPLYING.</b></li> <li>Run jets for a minimum of five (5) minutes. NOTE: If foaming becomes excessive, turn jets off. Some foaming is expected during the purging process.</li> <li>Maintain water temperature at 35°C (95°F) or higher and allow spa to circulate overnight with the jets off.</li> <li>Drain and flush the tub and its plumbing, including the filter area and the foot well. Rinse the tub thoroughly.</li> </ul>				
<b>Start-Up</b>	<ul style="list-style-type: none"> <li>Install the clean or new filter cartridge</li> <li>Fill the clean tub with source water. Use the carbon <b>Pre-Filter</b> on your garden hose to reduce the minerals in the source water..</li> <li>Test the water with test strips to determine water balance.</li> <li>Adjust Alkalinity and Hardness to ideal levels.               <table style="margin-left: 40px; border: none;"> <tr> <td style="padding-right: 20px;"><b>Alkalinity</b></td> <td>80 – 120 ppm</td> </tr> <tr> <td><b>Calcium Hardness</b></td> <td>150 – 250 ppm</td> </tr> </table> </li> <li>Bring water temperature to 38°C (100°F).</li> <li>Add one teaspoon full of <b>granular chlorine or bromine</b> sanitizer and let circulate with jets on and cover off for 20 minutes.</li> <li>Firmly shake one 480 ml bottle of <b>SPA SOLUTION®</b> and add to the water. pH levels will set automatically. You are ready for a luxurious hot tub experience.</li> </ul>	<b>Alkalinity</b>	80 – 120 ppm	<b>Calcium Hardness</b>	150 – 250 ppm
<b>Alkalinity</b>	80 – 120 ppm				
<b>Calcium Hardness</b>	150 – 250 ppm				
<b>Before or After Each Use</b>	<ul style="list-style-type: none"> <li>Add one teaspoon of <b>granular chlorine or bromine</b> and let sit with jets on and cover off for 20 minutes. Spa will be ready for next use.</li> </ul>				
<b>If Water Becomes Cloudy</b>	<ul style="list-style-type: none"> <li>Test for Alkalinity level and adjust as necessary. <b>Note:</b> pH level may be in the 7.8 to 8.0 range but this is acceptable with enzymes.</li> <li>Add one teaspoon full of <b>Non-Chlorine Oxidizer</b> between sessions and allow water to circulate.</li> </ul>				
<b>Every 2-3 Weeks</b>	<ul style="list-style-type: none"> <li>Remove filter cartridge and clean by soaking overnight in a pail of water with 100 ml of <b>FILTER SOAK</b> (It is suggested that you have a second cartridge to reduce down-time.)</li> <li>Rinse the cartridge with a strong water spray from your garden hose.</li> <li>Place the filter back in its receiver.</li> </ul>				
<b>Every Three Months</b>	<ul style="list-style-type: none"> <li>We recommend draining and refilling your tub and repeat start-up procedures.</li> <li>If draining is not possible, (winter months), firmly shake one 480 ml bottle of <b>SPA SOLUTION®</b> and add to the water to regenerate the enzymes.</li> </ul>				

**PLEASE NOTE:**

The Original Spa Solution® is an all-natural, non-toxic enzyme formula that will give you clean, clear water for up to 90 days with each application. It is an environmentally friendly product that will perform as promised when used as instructed. **Be sure to shake the product well before applying.**

The Original Spa Solution® is an ideal product for spa owners that have dermal sensitivity to harsh chemicals and are looking for a simple spa water maintenance programme.

**Be sure to allow 20 minutes for the sanitizer to perform its work and dissipate before getting into the spa or closing the cover.**
